Chuck Baldwin Stands for Constitutionally Limited Government, which would *dramatically lower our taxes.*

~ ISSUES ~

American Independence

The globalists are after our sovereignty,

our freedom and our national independence. I will stand up for the economic security and independence of our people and the sovereignty of our American republic.

Economy

A Baldwin economic policy will provide

opportunities and freedom for millions of average Americans, not obscene profits for international bankers and multinational corporations.

Education

I support the right of parents to provide for

the education of their children in the manner they deem best, including homeschooling...and my administration will oppose any federal legislation that would interfere with or restrict that liberty."

Military Adventures & Empire Building

We will stop this international

meddling and empire building. When Chuck Baldwin is sworn in as President of these United States the 'New World Order' comes crashing down!

Health Care

I strongly support the freedom of choice for

all citizens in their health care decisions and management!

Border Security & Illegal Immigration

America's illegal immigration

nightmare ends the day I become President!

Sanctity of Life

I will demand that Congress

enact Dr. Ron Paul's **Sanctity of Life Act** which would set forth that every unborn child is a 'person' under the Constitution, entitled to equal protection of the law and therefore, no unborn child could be killed without due process of law.

The 2nd Amendment

The Second Amendment Protects

Our Liberty! To help keep your family safe and your country free, go buy a gun.

United Nations

As President, I will terminate

United States membership in the United Nations.

Veterans & Military

I am eternally grateful to America's

veterans who have sacrificed so much to protect our nation and to preserve our liberty and, as President, I will honor our nation's commitment to them in every way.

A Strong National Defense

We will have a national defense that

is second to none, with armed forces that serve only under the American flag, and whose mission will be to defend these United States of America!

Restoring Liberty

Great are the dangers of giving unlimited,

unconstitutional power to a government that does not respect the checks and balances intended by our Constitution and Bill of Rights!

Eminent Domain Abuse

I will champion the property rights of

individuals and families and I will oppose eminent domain abuse whenever and wherever I find it in this country!

There is Still Hope for America

As we get out our message and it is

received by the people of America, we will find a ready audience for our message of freedom and hope!

Chuck Baldwin for President in 2008
