Joy Holt, Treasurer

In 1963 the USA was #1 in education, health, industry, standard of living, the biggest creditor nation in the World, with a trade surplus of several billion dollars. Now we are #20-40 in education, #37 in health, #6 in industry, destruction of the Middle Class, the biggest debtor nation in the world, and billions in trade deficits.

Today the USA's National debt of \$8.5 trillion with other obligations of over \$50 trillion. We have an annual budget of \$3.5 trillion, and then borrow hundreds of billions of dollars as annual budget deficit added to the National Debt. The USA has a Trade Deficit of \$800 billion a year thanks to NAFTA, WTO, and all so-called "Free Trade" Agreements passed by the US Congress and President to export millions of good jobs that benefit only large campaign contributing Multi-national Corporations in search of "cheap labor" at any cost, destroying our tax-base.

*When you find yourself in a deep hole
the first thing you have to do is:
"STOP DIGGING!"*

Economists calculate we lose 20,000 jobs for every billion dollars in trade deficit: 20,000 X 800 = 16,000,000 jobs. Service jobs cutting each others' lawns and flipping burgers while Congress votes to increase salaries by thousands of dollars adds insult to injury.

A successful nation must have a sound dollar and economy, rule of law, and protection of personal and property rights. Success is based on a 3-legged stool - Agriculture, Mining, and Manufacturing. This assures the "value-added" jobs that made the U.S. the greatest economy the World has ever seen.

Moral - If it ain't broke, don't fix it!!!

Good salaries circulate through the economy of a town several times: stores, banks, etc.

THE CONSTITUTION IS THE SOLUTION

Congress shall have power:

Article 1, Section 8, Clause 5:

To coin money, regulate the Value thereof, and of foreign Coin, ...

Abolish the Federal Reserve which is not federal, has no reserves, and instead is an illegal banking cartel. (Our Central Bank was created by stealth in 1913, is responsible for the Great Depression in 1929, multiple depressions, the dot-com bubble burst in 2000, housing bubble bursting in 2006, huge inflation by taking the U.S. off the gold and silver standard, destroying value of Dollar with worthless fiat paper money and fractional banking, charging the U.S. for printing our money, loaning it to us, and charging us interest for the loan - now exceeding over \$350 billion dollars a year.) This will end adding to national debt.

Save \$352,000,000,000 annually.

Article 1, Section 8, Clause 11:

To declare War, grant Letters of Marque and Reprisal, ...

6 months to move back to the U.S. After 6 months, evaluate business doing well enough to remain overseas, and give SBA loans to start up production in the U.S. Businesses not moving back to the U.S. will no longer have foreign located factories insured by U.S. taxpayers. All agriculture imports will be stopped immediately, with the exception of items not capable of
